

ASSOCIATED BUSINESS DEVELOPMENT (ABD)

WE CAN HELP PLAN YOUR EXPANSION PROJECT

In addition, we provide design, procurement and construction services. AEP specialists can work alongside your team to plan and build high-voltage distribution and transmission equipment that you will locate and own on your project site.

THERE'S POWER IN WORKING TOGETHER

Every day, AEP restores power quickly and safely to businesses like yours that are faced with on-site electrical failures of high-voltage distribution and transmission equipment. We respond with the equipment and expertise to get you back up and running.

Many businesses invest in high-voltage distribution and transmission equipment located on their properties to meet their unique power needs and business objectives. However, your business may not possess the resources and expertise to respond when faced with an electrical equipment failure and the resulting disruption to operations.

That's where AEP can help.

CALL AEP FOR EMERGENCY SERVICES

AEP can provide options when you need emergency access to replacement equipment and technical specialists. Call us to save time and worry. Our technicians will do whatever is required to locate and coordinate AEP resources as well as those available from our partners to make repairs and get your operations moving again.

PROUDLY SERVICING

Arkansas, Indiana, Kentucky, Louisiana, Michigan, Ohio, Oklahoma, Tennessee, Texas, Virginia, West Virginia

Services	Benefits
Emergency Service Restoration	Limit operational disruptions that result when your high-voltage equipment fails. AEP can provide and coordinate the resources needed to restore power promptly.
Distribution & Transmission	Achieve business goals by owning poles, substations, transformers, transmission lines and associated equipment that AEP installs, maintains and repairs for you.
Leasing	Wireless carriers can complete network projects by leasing space on AEP's communication towers and high-voltage electrical structures for their cellular equipment.
Training	Provide line and station mechanic training to municipalities, co-ops and electrical contractors when AEP has space available in classes.
Bucket Truck Testing	Ensure that your fleet vehicles are properly insulated and can withstand contact with high voltage by utilizing dielectric testing by AEP.
Material Sales	Over head & pad mount transformers, switches, poles, wire, insulators, cross arms, etc.
