

# In the market for a new appliance this summer?

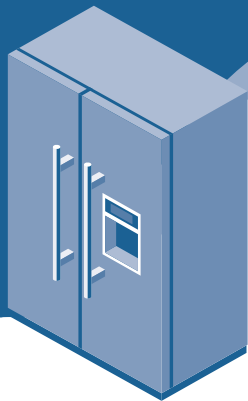

ENERGY STAR® certified appliances are built to standards that make them more energy efficient, saving you money by reducing energy use without sacrificing performance. When upgrading your appliances to one of these more efficient options, look for rebates on your purchase through Appalachian Power!

Appliances must be ENERGY STAR® certified to qualify for a rebate.

An AEP Company

TAKE CHARGE™

Visit [TakeChargeWV.com/rebates](https://www.takechargewv.com/rebates) to view all available rebates and submit online.

# Summer's here and the time is right for savings

Get your home ready for summer by scheduling an in-person or virtual **Home Performance Assessment** today. One of our Energy Advisors will assess your home for FREE and give it a score from 0-10 based on its energy efficiency. If your score isn't a perfect 10, that's ok! You can use our Quality Contractor Network (QCN)\* to make rebate-eligible improvements.

*\*You must use an approved contractor to qualify for rebates, who will submit on your behalf. Homes must be heated with electricity to qualify for a rebate.*

Visit [TakeChargeWV.com/homeperformance](https://TakeChargeWV.com/homeperformance) or call 888-261-4567 to schedule your Home Performance Energy Assessment today.
